

I am a K-LOVE listener and know this station serves me and my community by sending positive and encouraging messages of hope in this war-torn world. I am a better citizen by having heard the programs because I am happy to do good for other people. If I and the others in my community could not hear this station because it is was displaced by LPFM, we would be quite unhappy and less inclined to feel like the government was working for our best interests. K-LOVE serves the public interest by not confusing their clear and positive message with advertisements promoting vice in our society. It is very pleasant to hear "good news" rather than the self-centered tripe but on by other stations.
